

## D-Series

- Longest cycle life for traditional flooded lead batteries and the lowest cost of ownership.
- Suitable for both conventional and opportunity charging applications.
- Available in a full range of sizes.

## Fast Charge

- Built to accommodate higher current charging and last longer under rigorous fast-charge conditions.
- UL certified and designed for extended performance.
- Available in single and dual DC cable configurations.

## MaxPower

- Offers up to 10% more amp-hours for increased productivity.
- Features advanced active material and specific gravity ensuring longer run times and better cold storage performance.
- Ideal for multi-shift operations allowing for reduction in battery fleet size.

## HydraSaver

- Extends battery watering intervals from 1-2 weeks to 9-10 weeks.
- Bolt-on positive and negative terminals and cables simplify replacement and reduce safety hazards.
- Featuring an LED water level indicator for easy monitoring and a Flip-top Water Miser™ for convenient access.

## MaintenanceSaver

- Reduced maintenance to as few as four times per year.
- Suited for light-duty applications.

## Dominator®

- Sealed gel recombinant technology delivering maintenance-free and emissions-free performance.
- Zero watering required.
- Designed for conventional and opportunity charging.
- Suited for light and medium duty applications.

## Gel-Mate™ PowrMate™

- Integrated charger for ultimate convenience.
- Sealed gel recombinant technology delivering maintenance-free and emissions-free performance.
- Application-specific options:
  - PowrMate®: Suitable for light-duty applications.
  - Gel-Mate™: Suitable for all applications.

## ChargeMate™

- Flooded battery technology with integrated charger.
- Ideal for opportunity charging.
- Suitable for medium to heavy-duty applications.

## READY POWER LITHIUM

- UL2580 certified lithium chemistry (LFP).
- Rapid recharge and on-demand power.
- High energy density and long cycle life.
- Exclusively designed battery management system (BMS) and communication software.
- Complete End-of-Life solution.

## POWERFORCE

- 95% Energy efficiency (CEC compliant).
- Compatible with both lead and lithium batteries.
- Modular configuration and advanced controls with integrated breakaway connector.
